

## CLEAN TECHNOLOGY Finds Life Greener in SouthCoast Massachusetts

In the United States and the world, the market is growing for many forms of renewable energy, and SouthCoast Massachusetts is the ideal location for research, development, testing and marketing of renewable energy and clean technologies.

Whether wind power, biomass, wave power or solar energy, the SouthCoast region has the financial and R&D resources, as well as the business expertise to help emerging

clean energy technologies achieve dynamic business growth. Here in the SouthCoast, you'll find hands-on management assistance, guidance to access financing, business and technical support services to help clean technology companies with everything from incubator programs and entrepreneurial training to effective approaches to facilitate technology transfer and commercialization.

## QUALITY OF LIFE

SouthCoast Massachusetts offers a central location near the coast that's still close to the hiking and skiing mountains of the Northeast.

- Reasonable land and building costs --up to 50% less than the greater Boston market.
- Superb highway infrastructure with access to three major airports, rail service and two deep water ports.
- Thriving, vibrant business parks include sites with proper zoning and innovative research & development overlay districts to accommodate clean technology companies.
- Outstanding educational and cultural resources round out the picture of the perfect setting for the development, commercialization and expansion of clean technology industries.

## VALUE-ADDED RESOURCES

SouthCoast has everything you're looking for with good technical education systems in place and an available workforce as well as the resources and talents of the University of Massachusetts Dartmouth and its various centers of focused study.

### **ADVANCED TECHNOLOGY & MANUFACTURING CENTER**

- Clean Energy Laboratory
- Incubator location

### **SCHOOL FOR MARINE SCIENCE & TECHNOLOGY**

### **MARINE RENEWABLE ENERGY CONSORTIUM**

### **THE QUEST CENTER**

- Incubator location
